Jeppiar Engineering College

PROJECTS

Fees Management - [Link](#)

Developed a Fees Management System using React.js with complete CRUD functionality, enabling efficient fee tracking and management for students.

Compound Interest Calculator - [Link](#)

Built a Compound Interest Calculator using React.js to simplify financial computations. The application dynamically calculates and displays interest amounts based on user inputs, offering an intuitive and interactive user experience.

Portfolio - [Link](#)

Created a personal portfolio website showcasing projects, skills, and achievements, developed with modern web technologies. Designed a responsive and visually appealing layout to provide an engaging user experience.

MINI PROJECT

QR Code Generator - [Link](#)

Built a dynamic QR Code Generator using React.js, enabling text input and color customization. Utilized React hooks for state management and dynamic functionality.

To-Do List - [Link](#)

Developed a To-Do List application using React.js with features like add, edit, delete, and clear tasks. Enabled real-time task updates for an efficient and seamless user experience.

CERTIFICATE

- Responsive Web Design - FreeCodeCamp
- SQL (Basics) - HackerRank
- Fundamental of C Programming - Infosys
